Exploring Computer Science NTI

On each of our NTI days, you will be assigned a short video to watch and write a response about. All of the videos are about internet safety and appropriate behavior. For each NTI Day you will need to:

1. Watch the video.

2. Write a reflection about the video. Your reflection should be at least half of a page long and related to the scenario presented in the video.

3. Copy the "Stuff to Know" list that goes along with the video.

These assignments MAY NOT BE TYPED. You need to hand write your assignment. If you are on a phone, to save data, once you have watched the video, take screen shots of the "stuff to know", then copy them from the picture.

All NTI assignments are due within 3 days of returning from the snow day.

The videos are on the site http://www.nsteens.org/Videos

Day 1: 6 Degrees of Information
