

Objectives:

The student will be able to:

- Recognize various forms of communication as data exchange
- Describe the implications of data exchange on social interactions
- Consider privacy of data that they create
- Explain the difference between data used for making a case and data that informs a discovery
- Describe good research questions

- Texting
- Phone call
- Talking in person
- Facebook
- Twitter
- Email

| Scenario to communicate | Method | What data is available? | Who has access to the data? |
|-------------------------|--------|-------------------------|-----------------------------|
| | | | |

- What data is available?
- Who has access to the data?

- Which of the ways you give off data can be linked directly back to you?
- What are the possible implications of this data being linked back to you?
